

The services provided by Rigid Oilfield Services Ltd are unique and with distinct qualities. These factors are what set Rigid apart from all other vendors.

The company operates a fleet of custom made, one of a kind, spooling trucks and equipment that install and recover electric submersible pumping systems in the oilfield. At Rigid, all of our service equipment utilizes Tire Drive Technology, this system increases our products efficiency and safety.

Rigid has a demonstrated record of delivering high quality, reliable services via complex projects. We have a history of working closely, effectively, and with great synergy alongside large numbers of vendors and clients on projects. We are a trusted service provider which strives to excel in all aspects of customer service as well as field operations, and are passionate about what we do.

*"The long term business success of Rigid Oilfield Services Ltd. depends on our ability to continuously produce quality services that can be used safely by our customers. By anticipating and exceeding our customer requirements, Rigid plans to diversify allowing us to expand opportunities for our employees. To enact this mission we will support critical success factors such as Quality, Health, Safety, Environment, Customer Focus, People and Growth."*

**Rigid**  
OILFIELD SERVICES LTD.

**Spooling and  
Banding Specialists**  
[www.rigidoilfield.com](http://www.rigidoilfield.com)

Since our opening in 2006 Rigid has been an industry leader when it comes to safety, quality and customer satisfaction. We are committed to providing the industry's best for all of our customers. At Rigid we work hard to ensure the job is done right - right on time.

Not only are we your spooling and banding experts, we also provide top notch lay down and hot shot packages, Cannon guard application and reconditioning, rig less and instrumentation spooling. For the best service in the industry, contact Rigid Oilfield Services today.

### Lay Down Service

Our operators and technicians have specialty tools to lay down ESP Pumps such as:

- Clamps, hand tools, electricity meters for testing ESP Cable
- Compatible with Schlumberger/Reda Pumps and Wood Group Pumps

### Chemical Injection

Complete Chemical Injection/Capillary Line Systems

- Specialized Thermocouple completion services
- Both in house and on sight pressure testing and purging
- Customs check valves and fittings
- Multiple line spooling truck capable of handling ESP power Cannon Guards Application and Reconditioning

### Cannon Guard Service

Rigid is able to restore used Cannon Guards, and are the only service providers ready and able to offer this service

on site or at our home location. We have over 5,000 new clamps in stock at all times.

Send us your used guards and we will make them as good as new!

We provide on/off site inventory management to clean, resize, corrosion coat, package and batch test your cannon clamp protectors.

### Spooling and Banding

Rigid Oilfield Services Ltd equipment is designed to spool ESP Cable as well as capline, thermal lines, or any auxiliary line configuration required by the customer.

Our systems are equipped to purge and/or pressure test the lines. Our

experienced operators give us industry leading banding capability with the assurance of quality work.
